

March 26, 1984

LB 1124

their equal opportunity and equal shot at their particular version of the multinational tax bill. Now, I am like the fat man crawling through the barbwire fence, my last point that I want to make before I finish is just this, that these amendments in my opinion do just what the Department of Economic Development want done, to invite, encourage industry to come into Nebraska and stay here, and as they stay here, they will enlarge, expand and further develop the economic structure in the State of Nebraska. I can tell you that there is one petroleum company that right at this moment is on a hold of an expansion of their facilities at Beatrice depending upon what the outcome of this bill is. Now if there are others, and there may very well be, I cannot point them out, but I certainly am aware of that one and it is a sizeable expansion, one that will create more jobs, more revenue for the state and I don't think we should overlook that. With that, Mr. President, I would move for the adoption of my amendments. Thank you, Mr. President.

SENATOR CLARK: Senator Hannibal.

SENATOR HANNIBAL: Mr. Chairman and members of the Legislature, I would like to ask for a division of the Carsten amendment. I would like to ask us to consider first all of the amendment except subsection (b) of Section...well, it's on page 2 of the amendment and deals with lines 5 through 12.

SENATOR CLARK: That is divisible. We will take up everything except subsection (b) on page 2 of the amendment. For now we are on the first...you object to it? It is divisible. I mean, there is nothing to object to. Unless you want to challenge me. I am tough at this hour, don't do it. We will consider it divisible. With no objection we will take up everything now except the subsection (b).

SENATOR HANNIBAL: Mr. Speaker, may I ask then, am I able to speak at this point or do I...

SENATOR CLARK: Yes, you can speak right now, but we are on everything except that...
